

## EDUCATION

---

University of Arizona	Full Stack Web Development	2018
Mesa Community College	Networking and System Administration	2008

## TECHNOLOGIES

---

JavaScript · jQuery · PHP · MySQL · CSS · HTML5

## EXPERIENCE

---

Can't Say	Developer	2019-2020
-----------	-----------	-----------

*Contract position (I signed an NDA) for a Web portal that allows business owners to set up automated messages to their clients. The system is built on JavaScript, jQuery, PHP, and MySQL, and uses the Twilio API for communication.*

- Developed a messaging section that allows users to send text and media to their clients. Phone numbers can be selected from a searchable/sortable list, or manually-entered. Video and audio files are compressed and converted using FFmpeg. Messaging history for selected clients is displayed/updated with each text inside a bubble, and can be downloaded to an Excel sheet.
- Developed portal section for automated replies to a keyword. Users can specify the keyword and reply text to either automated or manually-sent messages.

On-Auk-Mor Trade Center	IT Systems Specialist	2013 – 2017
-------------------------	-----------------------	-------------

- Created database applications for storing and managing IT department passwords, IT/Maintenance department tickets, security event logs, employee information, and write-ups.
- Responsible for the installation, maintenance and support of networks, computers, POS systems, and surveillance cameras
- Responded to trouble calls

## PROJECTS

---

<u>Pac-Mental</u>	2016
-------------------	------

*Technologies used: HTML5, CSS3, JavaScript, jQuery, MySQL, PHP, Howler.js*

Pac-Man game based on original code featuring four new energizer types, expanding mazes, and more ghosts.
