EDUCATION

University of Arizona	*Full Stack Web Development*	**2018**
Mesa Community College	*Networking System Administration*	**2008**

TECHNICAL SKILLS

HTML5 | CSS3 | JavaScript | jQuery | Node.js | React | PHP | MySQL | MongoDB

EXPERIENCE

On-Auk-Mor Trade Center   *IT Systems Specialist*   **2013 – 2017**

- Independently developed five full stack database applications for storing and managing IT department passwords, IT/Maintenance department tickets, security event logs, employee information, and write-ups. Applications were session-based with user authentication and navigation history.
- Created backups of database files, troubleshooted code, and deployed content to server
- Responsible for the installation, maintenance and support of networks, computers, POS systems, and surveillance cameras
- Responded to trouble calls

PROJECTS

Write-Ups Database   **2017**

Technologies used: HTML5, CSS3, JavaScript, jQuery, PHP, MySQL, XAMPP, jSignature.js, Dropzone.js

Database for On-Auk-Mor to help track and store employee write-ups (initially, these were stored on paper inside filing cabinets). Interfaces with employee database; users can add, edit, and search employees from here. Different user levels. Users can add, edit, delete, search, filter, sort, lock, and email records.

Pac-Mental   **2016**

Technologies used: HTML5, CSS3, JavaScript, jQuery, MySQL, PHP, Howler.js

Pac-Man game based on original code featuring four new energizer types, expanding mazes, and more ghosts.

Employee Database   **2015**

Technologies used: HTML5, CSS3, JavaScript, jQuery, PHP, MySQL, XAMPP, Dropzone.js

Database for On-Auk-Mor that stores employee information and pictures. Users can add, edit, delete, filter, sort, and search.
